MOHAMMED AMASSI

mhmdsalah2022@gmail.com | +96879602001

EDUCATION

ISLAMIC UNIVERSITY GAZA - PALESTINE
B.Sc. in Information Technology

SKILLS

PROGRAMMING LANGUAGES
• Dart • Java • Flutter • Swift

TOOLS/SOFTWARE
•Git/Github • Visual Studio Code •
Android Studio •Google Cloud
Functions •Firebase SDKs •Firebase
Cloud Messaging
•Firebase •Firestore •SQL •Bloc
•Riverpod •Unit Tests •Widget Tests
•Integration Tests
•Clean Architecture, MVVM

COURSEWORK

ONLINE COURSES
Flutter & Dart Development
(Certificate)
Flutter Clean Architecture
(Certificate)
Effective Planning
(Certificate)
Business Management
(Certificate)

EXPERIENCE

OVX STYLE | Flutter Developer
Aug 2023- Nov 2024 | Remote
- Transformed a non-clean code into clean code by renaming variables, splitting code by responsibility, removing duplication, and organizing into logical layers.
- Learned and utilized Node.js and Google Cloud Functions to handle backend tasks, improving the app's functionality and server communication.
- Improved application performance by reducing setState and using Bloc state management instead.
- Coordinated with other developers to streamline workflows, resolve challenges, and ensure efficient teamwork.
- Collaborated across remote teams using Git and Agile practices.
- Successfully deployed app versions to both Google Play Store and Apple App Store, solving compliance, policy, and compatibility issues during submission processes.
- Technologies used: Flutter, Firebase, Firestore, Cloud Storage, Google Cloud, Node.js.

PROJECTS

THE X APP | Flutter Social Media App
- Developed **The X**, a full-featured social app integrated with Firebase, allowing users to create posts with text and images.
- Implemented a real-time platform with functionalities to like, comment, and share posts.

UISHOPY APP | Flutter e-commerce app
- Built a responsive Flutter e-commerce app **Uishopy**, allowing users to browse categories, search products, and complete purchases.
- Integrate external APIs to display real-time product data.

MOVIES APP | FLUTTER MOVIE BROWSING APP
- Developed a **MOVIES APP**, showcasing a wide range of movies across multiple genres, following Clean Architecture principles for maintainable code.
- Bloc was used for efficient state management, ensuring smooth user interactions and seamless performance.
